I.11 Starting Option

a) Guided Groups

With a limited number of groups, the MSR offers participants at selected start times to complete the course in a guided group. This service increases the starting fee by 15,- €.

Participants who are not able to estimate their capacity with certainty, are given the possibility to complete the circuit with a plausible distribution of energy.

The groups will be led by guides with cycling experience, who will ensure that the course is completed in a given total riding time.

The given total riding time (incl. breaks) takes into account the breaks at the refreshment points.

The given speeds (gross) are guideline values and will be influenced by the breaks if the total riding time is kept.

The duration of the stops at the refreshment points will be determined by the guides on the basis of their route tables.

We would like to point out that the duration of the breaks has a direct influence on the speed. I.e. the longer the break is designed, the faster are the peaks of the ride. Furthermore, this means that the selected speed of the guided group should be in the medium performance range of the participant.

The guides are recognizable by MSR guide vests in fluorescent colors. How participants and guides will be paired up on the event weekend will be announced in a newsletter in good time before the event.

There is no legal right to be accompanied by the guide.

The allocation of the guided groups is planned as follows:

Date	Time	km/h (gross)	Riding Time/ hrs. (incl. breaks)	max. Nr. Participants	Guide
25.05.	03:35	22	approx. 15	20	MSR

From the start the regulations of the StVO apply - also immediately after the start in the Kulturpark.

In the starting area there is a service point for repairs to the bike, for which a fee will be charged. Furthermore, toilets will be provided there.

V.15 Equipment and Accessories

a) Approved Bicycles

For the MECKLENBURGER SEEN RUNDE any technically completely intact, two-wheeled bicycle without additional drive is permitted.

Recumbents and handbikes are allowed as long as they are technically intact and comply with the regulations of the StVZO road safety code.

For safety reasons, recumbents and handbikes must be equipped with a bicycle pennant, which must be attached to a pennant pole at least 160 cm long.

Recumbent cyclists and handbikers who start on Friday evening must also mount a pennant light (flag light) for the night ride.

Recumbent cyclists and handcyclists are asked to line up at the rear of their starting block for riding safety.

Multi-track vehicles are specifically excluded, with the exception of hand bikes.

Track bikes/singlespeeds/fixies are only permitted if they have a freewheel hub and two independent brakes.

b) Illumination

All participants who start between Friday evening from 20:00 hrs or on Saturday morning until 04:30 hrs are obliged to start with a mounted and usable lighting system as well as additional reflectors on the bike, namely at least 1x on the front of the head tube or the fork in white and at least 1x on the rear of the seat post or the seat stay in red.

Participants who violate this rule will not be allowed to start until the appropriate equipment has been installed in a usable condition.

MECKLENBURGER SEEN RUNDE 2024

The assembly of the required lighting and reflectors will be strictly controlled at the pre-start.

No exceptions will be made to the lighting requirements. Inquiries made in this regard will go unanswered.

Participants who finish the MSR on Saturday evening in the dark must also ensure sufficient and legally compliant lighting on their bicycle. Failure to comply with this requirement will result in disqualification.

c) Handlebar Attachments

Handlebar attachments are only permitted if they do not protrude beyond the brake and/or shift grips.

Exceptions to this rule will not be permitted.

Compliance with the regulations on handlebar attachments will also be strictly controlled at the pre-start.

d) Accessories

For safety reasons, the following additional attachments are not permitted:

- Disc wheels front / rear

Helmets are compulsory without exception for the MECKLENBURGER SEEN RUNDE! The helmet must bear a test seal of an internationally recognized testing institute (e.g. DIN standard 33954, SNEL and/or ANSI standard, EC or GS).

f) Clothing

There are no separate regulations for the type of clothing you wear. However, the clothing must not pose a safety risk.

The weather in the Mecklenburg Lake District in May is generally already known for pleasant to cool temperatures, which can vary from a spring to summer-like feeling. Therefore, we recommend that you equip yourself with clothing that is suitable to protect you from low temperatures, wind and rain.
